Bzrk records

Bzrk records was founded by the Italian producer Bertocucci Feranzano in Feranzano's attic three months ago. On it's first release he brings you the party-hit "XTC-love" and the first 500 copies are printed on picturediscs. Bzrk records contain hardcore tracks from producers from USA, Belgium, Germany, Holland, Italy and even Australia.

Waxweazle vinyl

A few years ago Rob Fabrie and two friends founded Holy Noise. They discovered that together they had a lot of potential and produced for example the hitsingle "James Brown is still alive". Later that year due to some complications they decided to split up and Rob Fabrie was alone again. After a few soloprojects for famous international labels he now has his own label at ID&T, and since he had already used the name "DJ Waxweazle" many times before, this has become the label's name... Waxweazle vinyl brings you "hard but happy" hardcore in a Rotterdam-style.
